Education

University of Greenwich, BSc Hons in Computer Science (Artificial Intelligence) Sep 2024 – Grad: May 2027
Average for second year: 72.13%

Cambridge Tutors College, A-Levels in Computer Science, Math, Photography, Persian Sep 2022 – Sep 2024

Projects

Netflix Customer Analytics: Churn and Retention Python, SQL, Power BI
github.com/mohammad-daliri/Netflix-customer-analytics

- Cleaned and validated a **50,000-customer** subscription dataset in Python (Pandas), flagging data-quality issues such as placeholder end dates and 1,824 viewing records dated after the subscription end date.
- Found that **Basic subscribers churn at 25.2%**, over 3× the Premium rate (7.6%), and that cancelled customers watch less (227 vs 262 minutes per week).
- Built a **3-page interactive Power BI dashboard** and **SQL analysis**, and recommended targeted retention offers for Basic subscribers.

UK House Price Analysis, 1968–2025 Python, SQL (DuckDB), Power BI, DAX
github.com/mohammad-daliri/uk-house-price-analysis

- Cleaned a **149,085-row** UK house price dataset and analysed it with **SQL window functions in DuckDB**.
- Found the average UK price rose 8,062% (£3,311 to £270,259), detached homes cost 2.3× flats, and former owner-occupiers pay about **45% more** than first-time buyers in England.
- Built a **four-page Power BI dashboard** on a **star schema** with DAX measures for region, property type and buyer comparisons.

Binary Prime Finder Python, Algorithms
github.com/mohammad-daliri/my-python-projects

- Built **three versions** of a program that finds primes hidden in binary-string substrings and **benchmarked** them on inputs up to 96 bits.
- Optimised primality testing and substring handling, cutting the largest test from **55.7 s to 19.1 s**.

Secure Password Management System Python, SQLite, Cryptography
github.com/mohammad-daliri/my-python-projects

- Built a local **encrypted password vault** using SQLite, with **Fernet encryption** (AES with HMAC) for stored credentials.
- Implemented user login, a **command-line interface** to add, view and delete saved passwords, and a strong password generator using the secrets module.

Experience

Retail Associate – TK Maxx Oct 2026 – Present

- Provide friendly customer service on the shop floor, helping shoppers find products and answering queries.
- Replenish stock, keep displays tidy and handle till transactions accurately.

Self-Employed Trader Jan 2021 – Sep 2025

- Executed cryptocurrency trades using exchanges such as Binance and KuCoin, alongside equities and forex markets.
- Optimized trading strategies through technical analysis, leveraging price action, Fibonacci levels, and Elliott Wave theory.

Waiter – Atesh Turkish Restaurant, London Nov 2023 – Jun 2024

- Provided attentive service to guests in a fast-paced environment.
- Managed 15 tables simultaneously and handled transactions.

Skills

Python, SQL, Power BI (DAX), Excel, R, HTML, C, JavaScript

Courses and Certifications

- Google Data Analytics Professional Certificate – Google (Coursera)
- SQL (Intermediate) – HackerRank
- Power BI Essential Training – LinkedIn Learning
- Excel Essential Training – LinkedIn Learning
